STEMculture Podcast 0:07

[Intro music]

Dani 0:16

STEMculture Podcast is focused on improving the culture of STEM by discussing topics that affect graduate students, postdocs, early career researchers, and beyond. We wanted to demystify STEMculture and highlight stories of perseverance and persistence in STEM.

Will 0:29

We choose a topic and do three episodes on it. Season One had three series called culture, work life balance, and how to publish. In between series we released in STEM episodes, where we seek out a diverse array of cultural, linguistic and socioeconomic voices to get their perspectives on how we can all change STEM culture for the better.

Moncie 0:52

The five of us have had more than 25 years of graduate school experience between us. We've had experience navigating gender based discrimination and sexual harassment, neurodiversity, mental health, grief, terrible advisors, good advisors, accepted papers, rejected manuscripts, rejected fellowships...

Brooke 1:08

...successful NSF GRFP applications, professional development, science communication, and STEM employment outside of academia. But most of all, we care deeply about graduate students and people pursuing STEM careers and we want to help making all things better.

Zach 1:27

We are on all the podcasting platforms, please subscribe so you never miss an episode. You can also find STEMculture Podcast at [STEMculturepodcast.com](https://stemculturepodcast.com) or on Twitter, Facebook or Instagram as STEMculture one word Podcast.
